

# ASPA KALAFATI

## PERSONAL DATA

Date of Birth : 30-4-1964  
Adress : Agios Ioannis Sparta, 23100, Greece  
Telephone : 2731021766  
6989923567  
e mail adress : akalafati@cosmoanelixis.gr

## STUDIES

1982-1987 : Law School of Aristoteleio University  
of Thessaloniki

## PROFESSIONAL EXPERIENCE

Constant Practice of Law since 1987 up to now  
Experience in Administrative Law

## OTHER QUALIFICATIONS

First Certificate in English, Cambridge  
Certificat de Francais  
Amateur History Researcher  
Mother of an 18 years old son

## COMMENTS

Having an enormous appetite of exploring everything that surrounds us and searching for answers for the human behaviour, I had the fortune to meet the “soul” of Cosmoanelixis, Olga Gouni.

This was the opportunity for me to open my mind and see the world in a new prospective, while new horizons of studies and wisdom were opened for me.

Practicing law every day, is a tough procedure, but also very interesting.

Every aspect of our lives is connected with human law.

So it is scientifically very interesting for me to work on fields of the law system that are not developed yet enough.

The way I see it, this is a challenge for me.

Viewed generally, there are obviously two ways of increasing the mass of mankind: first, by aiding and maintaining those forces and conditions which tend to increase it; and, second, by opposing and reducing those which tend to diminish it. The mass will be increased by careful attention to health, by substantial food, by moderation, by regularity of habits, by promotion of marriage, by conscientious attention to children, and, generally stated, by the observance of all the many precepts and laws of religion and hygiene. But in adding new mass to the old, three cases again present themselves. Either the mass added is of the same velocity as the old, or it is of a smaller or of a higher velocity.

...

Stated more to the point, if, for example, the children be of the same degree of enlightenment as the parents, that is, mass of the "same velocity," the energy will simply increase proportionately to the number added. If they are less intelligent or advanced, or mass of "smaller velocity," there will be a very slight gain in the energy; but if they are further advanced, or mass of "higher velocity," then the new generation will add very considerably to the sum total of human energy.

Nikola Tesla,

"How to Increase Human Energy"
